### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 30 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

***Election/Restriction***

1. An election without traverse of species 6 (embodiment 6, Figure 16) comprising claims 15-20 is acknowledged. Thus, claims 15-20 are being examined, and claims 1-14 and 21-65 are withdrawn from consideration.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Okumura (US 6008871).

Okumura discloses a display including a display medium for controlling a state of light passing through the display medium, the display being characterized in that, provided that one direction away from the display medium is termed "first direction" and the other direction away from the display medium is termed "second direction", the display medium and selective reflecting means (e.g., 405) for reflecting light in a first state and allowing light in a second state to pass through are disposed in this order in the second direction, and the selective reflective means is disposed only in the second direction of the display medium (see at least Figure 4).

***Allowable Subject Matter***

3. Claims 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a display device comprising a combination of various elements as claimed, more specifically, a combination of the followings: the display medium and selective reflecting means for reflecting light in a first state and allowing light in a second state to pass through are disposed in this order in the second direction, and the selective reflective means is disposed only in the second direction of the display medium, a non-transmitting area which does not allow light to pass through is provided in the second direction of the display medium, and between at least a part of the non-transmitting area and the display medium, light reflecting means for causing light passing through the display medium in the second direction to be reflected is provided.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
